# Feed recommendations according to fish size

## Advance and Top

- Starter feeds that are proven to work well

## Hercules Vital Plus

- Fry feeds that improve the immune systems of fish

## Hercules Vital

- For when you want to ensure the good general condition of your fish in all conditions and maximise the results

## Hercules Baltic

- The low phosphorus content enables high feed utilization with the phosphorus quota specified in the feeding permit
- Choose Baltic Opti when you want to optimise the fatty acids in fish

## Hercules Omega

- Maintains fish well-being over a longer period of feeding due to the favorable EPA and DHA levels in the feed

## Hercules Nbalance

- Low nitrogen content allows for maximum additional growth for nitrogen-limited fish farming

## Hercules EX / EXR / EXR WE

- For when you want a low FCR and to maximise growth
- For when health-promoting additives are not required to maintain the general condition of the fish

## Ova

- Top feed for broodstock and trout
