

RESPONSIBLE SOURCING POLICY OF ALLTECH FENNOAQUA

- The feed materials are sourced only from suppliers that are committed to our Supplier Code of Conduct. The Supplier Code of Conduct includes requirements concerning environmental responsibility, labour conditions, human rights, and the prevention of child and forced labour.
- The feed materials delivered to us are in compliance with the requirements of the EU legislation as well as the local laws in the country of origin.
- The quality of feed materials delivered to us are as mentioned in the supplier product specification.
- The feed materials delivered to us are free from genetically modified organisms (non-GMO).
- The feed materials delivered to us are free from salmonella.
- The feed materials delivered to us are free from ruminant DNA.
- The marine-based feed materials delivered to us do not come from fish species that are categorized as vulnerable, endangered or critically endangered according to the IUCN Red List of Threatened Species.
- All plant-based feed materials delivered to us are sourced through supply chains with a deforestation and land conversion cutoff date of 31 December 2020. We only use soy products that are 100% certified (e.g. ProTerra, RTRS).
- The feed materials delivered to us are sourced from low-risk countries, as far as possible.
- We are actively sourcing alternative feed materials that are produced according to the Circular Economy principles, focusing on sustainable development and lower use of natural resources.
